Data Dictionary – Healthcare Operations & Revenue Cycle Analytics

Coverage: 2021–2024

This document describes the available tables and the meaning of each column provided in the dataset.

Table Inventory

Table	Type	Description
Encounters (appended from 3 files)	Fact	Clinical encounters across facilities, departments, providers and p
Claims (appended from 3 files)	Fact	Revenue cycle claims linked to encounters and payer plans.
Patients	Dimension	Patient demographics and clinical risk indicators.
Providers	Dimension	Provider master with specialty, grade and department alignment.
Departments	Dimension	Department master with operational attributes.
Facilities	Dimension	Facility master including location and capacity attributes.
InsurancePlans	Dimension	Insurance plan master including contractual and operational attrib
Procedures	Dimension	Procedure/service catalog with service line and baseline charge a

Fact – Encounters

Column	Description
EncounterID	Unique identifier for each clinical encounter.
EncounterDate / VisitDate	Encounter date. VisitDate is used in the 2024 file.
PatientID	Identifier for the patient associated with the encounter.
FacilityID	Facility where the encounter occurred.
DepartmentID	Clinical department responsible for the encounter.
ProviderID	Provider responsible for the encounter.
ProcedureID	Primary procedure/service associated with the encounter.
EncounterType	Encounter classification (Outpatient, Inpatient, ER, Observation).
SeverityLevel / Severity	Encounter severity category. Severity is used in the 2024 file.
LengthOfStayDays / LOS_Days	Length of stay in days for applicable encounter types. LOS_Days is used in the 2024 fil
AdmissionSource	How the patient arrived (Self, Referral, Ambulance, Transfer).
DischargeDisposition	Disposition at end of encounter (Home, Referred, Admitted, Deceased).
SatisfactionScore / SatScore	Patient satisfaction score. SatScore is used in the 2024 file.
ReadmissionFlag	Indicates whether the encounter is associated with a readmission event.
ResourceCostEstimate / Resource_Cost	Estimated resource cost for the encounter. Resource_Cost is used in the 2024 file.

Fact – Claims

Column	Description
ClaimID	Unique identifier for each claim.
EncounterID	Identifier linking the claim to the encounter.
ClaimDate / BillDate	Claim/billing date. BillDate is used in the 2024 file.
PatientID	Identifier for the patient.
PlanID	Insurance plan identifier.
BilledAmount	Amount billed to the payer.
AllowedAmount	Amount allowed based on contractual terms.
PaidAmount / Paid_Amount	Amount paid by the payer. Paid_Amount is used in the 2024 file.
PatientResponsibility	Amount assigned to patient responsibility.
DeniedFlag / Denied_Flag	Indicates whether the claim was denied. Denied_Flag is used in the 2024 file.
DenialReason	Reason category for denial when applicable.
ClaimStatus	Status of the claim (Paid, Pending, Denied).
DaysToPayment	Days elapsed between billing and payment outcome.
WriteOffAmount / WriteOff_Amount	Write-off amount associated with the claim. WriteOff_Amount is used in the 2024 file.

Dimension – Patients

Column	Description
PatientID	Unique identifier for each patient.
PatientName	Patient display name.
Gender	Patient gender.
Age	Patient age.
ChronicCondition	Primary chronic condition classification.
RiskStratification	Risk stratification category.
SocioEconomicBand	Socio-economic band classification.
ResidencyStatus	Resident vs Non-Resident classification.
PrimaryPlanID	Primary insurance plan identifier for the patient.
City	Patient city.
EnrollDate	Patient registration/enrollment date.
ReadmissionRiskScore	Continuous score representing readmission propensity.

Dimension – Providers

Column	Description
ProviderID	Unique identifier for each provider.
ProviderName	Provider display name.
Specialty	Provider specialty.
DepartmentID	Department assignment for the provider.
EmploymentType	Employment type (Full-Time, Part-Time, Contract).
ClinicalGrade	Clinical seniority/grade.
YearsExperience	Years of professional experience.
HireDate	Provider hire date.

Dimension – Departments

Column	Description
DepartmentID	Unique identifier for the department.
DepartmentName	Department name.
ClinicalGroup	Higher-level clinical grouping.
Is24x7	Indicates if the department operates 24/7.
CostCenter	Cost center code.
StaffingLevel	Reported staffing level indicator.
OperationalTier	Operational tier used for service categorization.

Dimension – Facilities

Column	Description
FacilityID	Unique identifier for each facility.
FacilityName	Facility name.
City	Facility city.
Region	Facility region.
FacilityType	Facility classification (Hospital, Clinic, Diagnostic Center).
BedCount	Bed capacity (where applicable).
ICUBeds	ICU bed capacity (where applicable).
OpenDate	Facility opening date.

Dimension – InsurancePlans

Column	Description
PlanID	Unique identifier for the insurance plan.
Insurer	Insurer name.

Column	Description
PlanType	Plan type (Public, Private, Self-Pay).
CoverageLevel	Coverage level classification.
CopayPct	Copay percentage.
AllowedRateFactor	Factor used to estimate allowed amount from billed amount.
ClaimDenialBaseRate	Baseline denial rate associated with the plan.
TypicalPaymentDelayDays	Typical payment delay in days.
ContractModel	High-level contract model classification.

Dimension – Procedures

Column	Description
ProcedureID	Unique identifier for the procedure/service.
ProcedureCode	Procedure code.
ProcedureName	Procedure name.
ServiceLine	Service line classification.
CareSetting	Care setting category.
BaseCharge	Baseline charge amount for the procedure.
RVU	Relative Value Unit measure for complexity.
IsImaging	Indicates whether the procedure is imaging-related.
